HIGH PERFORMANCE DOOR SYSTEMS

# THE COMPANY

**AUTO MOSSA Equipment Ltd is a Design and manufacturing business specialising in High Performance Door Systems.**

With over 20 years of experience in the high performance door industry, some of Australia's and New Zealand's industry experts have come together to establish AUTO MOSSA, an organisation with a passion for design that continuously strives for innovation.

---

## DESIGNED AND MANUFACTURED IN NEW ZEALAND

**“We know every detail of our doors because we design and manufacture them here in New Zealand.”**

We pride ourselves on pushing the boundaries when developing ideas and through the process of exploration we often find new ways of doing things. It is our intention that every product we launch to the market will also come with an 'international patent pending', further emphasising our drive for innovation and added customer value. We are also able to work with architects and specifiers early on in the design stage, to develop working models and concepts.

# SEGMENTS WE WORK IN

- Distribution and Logistics
- Food and Beverage
- Cold Storage
- Pharmaceutical
- Manufacturing

**AUTO MOSSA provides a range of solutions for many industry segments.**

AUTO MOSSA has built up over 20 years' experience working with key segments such as: Food and Beverage, Cold Storage, and Distribution and Logistics. We have a targeted approach to segments so offer and deliver product that fit an application specific to that segment. We are also aware that the customer is looking for a cost effective and reliable solutions with low life time running costs.

# HIGH PERFORMANCE DOORS

**High Performance Doors  
AUTO MOSSA offer a  
range of door models for  
a number of specialised  
applications.**

Leading the range for AUTO MOSSA is the Hyperglide. Suited to the rigors of the Distribution and Logistics industry, the Hyperglide series features the patented Airstrip design and is ideally suited for large door openings with heavy traffic demands. Food and Beverage, Cold Storage, and Manufacturing are supported by a number of specialist products for a wide range of applications within these segments. For any difficult or unique requirements, our design team can provide custom solutions and special builds for all industries.

# DOCKING SYSTEMS

**AUTO MOSSA provides wider product solutions for both small and large projects.**

AUTO MOSSA offers leading branded products for docking systems, including a range of dock options as well as dock seals and dock doors. Providing the customer with a holistic solution is an important component of the service we deliver.

---

## SERVICE

**Being a design and manufacturing company means our service capability is enhanced.**

AUTO MOSSA by nature is a problem solving organisation, it's in our blood and we love to solve customers' problems. If we cannot get a part we will make it or redesign it. We have a wealth of experience in the market and have a broad range of product knowledge. Our service and technical capability is something we are proud of and stand behind.
